KT-363 Mini-Lathe

KT-363 \$965

The **WoodWrite, Ltd. Model 363** fully USA made, comes complete; mounted, aligned and ready to plug in and operate.

- overall length = 29" (74cm)
- depth = 16" (41cm)
- weight = 33 lbs (14k)
- tail stock includes a high speed live center with radial needle bearing and ball thruster, and easy-release knob
- 16.5" (42cm) between centers
- 2" high-speed ball bearings rated at over 35,000 rpm
- 5.5" (14cm) swing over bed
- 2.5" (6.3cm) swing over saddle
- motorized saddle drive is variable speed, moves 1" in 10.5 sec., variable to 1" in 6 sec. Moves on two polished and ground tool steel rods; slide includes 4 bronze, self-lubricating Oilite® bushings
- 1/4" jeweler's precision collet and collet closer nut on 3/4" - 16 drive spindle, for greater precision and accuracy in turning
- 1/3hp A/C induction motor
- two six-step pulleys and long-life belt (speed range 450 - 5700 rpm)
- the lathe of anodized aluminum extrusions with a bed of double 3/4" precision ground tool steel is assembled, aligned and mounted on a 3/4" wood base edged in contrasting hardwood, pre-drilled for easy mounting to your work bench (screws provided)
- the rear tool mount with furnished carbide tipped cutting tool allows full front sanding/polishing access
- 99% efficient dust collection manifold moves with your cutting tool (easily connects to your 2.25" shop vac hose)
- can upgrade to **KT-462 CNC lathe**, call for price.

KT-462 CNC Lathe

KT-462 \$3,990

Same specifications as the **KT-363**, plus: two stepper motors to control longitudinal feed plus position of cutting tool • Pentium PC to control the lathe, pre-loaded with software to make all **WoodWrite, Ltd.** pen/pencil styles, plus many other patterns • all **WoodWrite, Ltd.** mandrels included - each secures into a 1/4" collet which is far more accurate than a Morse taper system or Jacob's Chuck.

Custom Lathes

The length between centers may be increased up to 48", and the swing over the saddle may be increased up to 4.125". Call for details.

KT-162 Mini-Lathe

KT-162 \$695

Same specifications as the **KT-363**, minus the motorized saddle and stop switches. Saddle movement is generated manually using the **E-Z Guide™**.

Video Tape

VT-00 \$7.50

Video tape demonstration of the Model 362 "automatic" mini-lathe and duplicator. 20 minutes long, VHS. (PAL available on request). Includes shipping and \$10 gift certificate.

Engineering research brings you a breakthrough in mini-lathes,

the **WoodWrite, Ltd. Model 363**, the only mini-lathe available with a motorized saddle drive and stop switches on the head and tail stock. Simply secure the wood to be turned, set your depth of cut with the micrometer dial, accurate to a thousandth of an inch, and flip the drive switch. The variable speed motorized saddle moves along the lathe bed, making the depth of cut selected. When it completes the cut it touches the limit switch and stops. You then select your next depth of cut, push the toggle in the opposite direction and the saddle will begin again, stopping when it reaches the other limit switch. The mechanism works so smoothly that tool marks are a thing of the past. When you are finished cutting, simply use a little 400 grit abrasive cloth to obtain an incredibly smooth finish. You can turn metal too, ask us how.

WoodWrite, Ltd. KT- 363 Mini-Lathe \$965

Every operation in turning your small parts is automatic

when using the **Model 462 CNC lathe**. We'll even furnish the Pentium computer, with software pre-loaded to make every pen and pencil we sell, plus some other unique programs which are fun and profitable to make. Simply load the wood onto the lathe, set the zero points with a few clicks of the mouse, start the spindle motor and walk away. Your project will be turned perfectly, each and every time. You'll be

WoodWrite, Ltd. KT- 462 CNC Lathe \$3,990

Without computer \$3,490

amazed as the tool moves back and forth, in and out, at the proper speed, cutting parts consistently time after time, exactly to size. Want to turn other types of parts? With a little practice, you can write your own programs. Or, send us a line drawing or sample part and we'll write it for you. You'll receive a sample part with the program on disk. As usual, you'll always receive our famous **WoodWrite, Ltd.** service, second to none.

The Lathes

Why invest in a WoodWrite, Ltd. mini-lathe?

WoodWrite, Ltd. lathes are the only mini-lathes that come complete with a 1/3hp motor; mounted, aligned and ready to use ten minutes after you unpack it. Included are a saddle-mounted carbide tipped cutting tool (the **Model 363** has the only motorized saddle drive on the market), and micrometer dial which allow you to set an exact depth of cut accurate to within 1/1000th of an inch (no hand-held tools required), as well as six exact speeds with a top speed of 5700rpm. **WoodWrite, Ltd.** lathes are not imported, but are made in our factory near Baltimore, MD of precision aluminum extrusions anodized gold with black accents (anodizing is almost diamond-hard), and have a bed of precision 3/4" polished and ground steel rods. They are the only lathes in the world with dust collection manifolds, which remove up to 99% of dust and chips using a normal household shop vacuum. Ours are also the only lathes with an unconditional one year warranty.

Multiple vs. variable speeds.

When turning materials of different densities such as various woods, metals and plastics, the ability to adjust your speed is of the utmost importance. Obviously, knowing what those speeds are is also very important. There are lathes with variable speeds and those with belt driven adjustable speeds. Variable speed lathes do not give you a definite speed to chose. The ratios of a belt driven lathe, such as a **WoodWrite, Ltd.** lathe, tell you the exact speed chosen.

What are the advantages of the higher RPM?

Machinists always speak of feed and speed. Speed is imperative to achieving a smooth cut when turning small diameters. At 5700rpm, **WoodWrite, Ltd.** lathes lead the industry, producing a cut so smooth that some woods appear to have already been sanded.

What else do I have to buy to operate the lathe?

Unlike some other brands, your **WoodWrite, Ltd.** lathe will come to you complete - mounted, aligned and ready to run. You do not need to assemble it, add a motor, build a base or perform any electrical wiring. Simply mount the appropriate mandrel (included in our Production Systems), for the type of pen you wish to turn.

What other types of projects can I turn?

You may use any **WoodWrite, Ltd.** lathe to turn any project up to 16.5" long, and diameters of up to 2.75" over the saddle, or up to 5.5" over the bed (freehand). Your lathe will turn wood, metal, plastics, bone, horn and other substances.

Custom Length Lathes

If you need to turn objects which are small in diameter, but very long, like a pool cue or golf club shaft, give us a call. We'll be happy to discuss manufacturing a custom lathe to meet your requirements. Also, look for the **WoodWrite, Ltd.** pool cue lathe in the near future.

Physical Limitations

WoodWrite, Ltd. lathes were originally designed for use by the Maryland Chapter of Disabled American Veterans, and in most cases may be used "as is" by someone with a physical limitation with no difficulty. If needed, however, we have vast experience making design modifications which capitalize on individual abilities, and we're proud to be able to claim 100% success.

Copy-Cat Duplicator™

Let your imagination run wild! Use your **WoodWrite, Ltd.** lathe to produce Mont Blanc® style, ergonomic, or any other pen/pencil design you may desire, without hand turning. You

KT- 16 Copy-Cat Duplicator™ \$199.95

can also make chess pieces, small spindles, letter openers and knife handles. Work from one of our patterns, make your own, or use our Pattern Clamps to hold another manufacturer's patterns. Using the **Copy-Cat Duplicator™** is simplicity itself; just install it, attach a pattern, load your wood and begin turning. The stylus follows the pattern, shaping the work into an exact replica, allowing you to make item after item uniformly, precisely and accurately.

KT-16	for Model 162 - 363 series lathes	\$199.95
KT-20	Pattern Clamps	\$ 14.95
KT-17	Blank Template	\$ 5.00

Hand Turning

Tool Rest for free hand turning, attaches directly to saddle, base may remain mounted during all operations (includes KT-1402 screw center)

KT-11	\$28.50
Face Plate, undrilled	for turning small bowls	
KT-7301	\$ 9.20

KT- 11 Tool Rest \$28.50

Optional Lathe Accessories

Drilling Tailstock Drill your own blanks using your Model 160 or later lathe. (Use a Jacob's Chuck to hold the drill bit and a 3 or 4 Jaw Chuck to hold the wood in the headstock.)

KT-18	\$99.95
--------------	-----------	----------------

3 Jaw Chuck holds round stock and **4 Jaw Chuck** holds square or irregular stock for free hand turning, turning solid blocks, or drilling.

KT-5201	3 Jaw Chuck	\$68.25
KT-0301	4 Jaw Chuck	\$78.45

Jacob's Chucks are used to hold a drill bit while using the Drilling Tailstock.

KT-1901	0 - 1/4"	\$16.50
KT-2901	1/16" - 3/8"	\$17.10
KT-3901	1/8" - 1/2"	\$32.30

Drill Bits Use to drill your own blanks. Bits are very slightly oversized to allow for contraction of the wood. Our CN-01 glue (\$9.95) compensates for this if needed.

CN-30	"V" for Signature™ pens	\$5.95
CN-31	"J" for Slimline™	\$4.45
CN-32	11mm for WriteMaster™ pen top . .	\$17.95
CN-34	3/8" for 10mm projects	\$6.90
CN-33	"O" for Continental™, Executive Slimline™, WriteMaster™, Signature™ pencil	\$9.95

Collet Set holds components or mandrels. Set includes closer, 1/8, 5/32, 3/16, 7/32, 1/4, 9/32, 5/16 and one blank. (Note: a 1/4" collet, which accepts all **WoodWrite, Ltd** mandrels, comes with your lathe.) **KT-0401** **\$32.50**

KT-1401	1/4" Collet	\$7.10
KT-1402	Screw Center	\$1.00
KT-04	Carbide Tipped Cutting Tool	\$5.95
KT-03	Drive Belt	\$6.15

Sanding Bushings

Sanding Bushings are used with 7mm mandrels and are the exact size of the completed wood blanks. Made of hardened steel, but you must be careful not to hit them with your chisel or sanding cloth, as you will change the measurements. You do not need sanding bushings if you are using a **WoodWrite, Ltd.** lathe.

KT-25	Slimline™	\$10.00
KT-26	Exec. Slimline™	\$10.00
KT-27	Continental™	\$10.00
KT-28	Signature™ pen	\$10.00
KT-31	Signature™ pencil	\$10.00
KT-29	WM p/p (2 sets)	\$15.00

Mandrels

Mandrels are used to mount the wood blanks on the lathe, and are secured with a 1/4" collet - far more accurate and flexible than a Morse taper system. (Note: the appropriate mandrels are included with Production Systems and start-up kits.)

KT-15	7mm, Slimline™	
FRB-10	9mm, Signature™ pen	
KT-21	8/11mm, WM pen	
KT-22	8mm, Continental™, Executive Slimline™, Signature™ pencil, WriteMaster™ pencil	
KT-24	10mm	

All Mandrels \$20.00

Start-Up Kits

Already have a production system but want to start with a new pen style? Our start-up kits are just what you need. You receive an assortment (our choice) of pre-cut & drilled wood, total of 10 pen/pencil kits, instructions and the appropriate mandrel(s). If you are **not** using a **WoodWrite, Ltd.** lathe, you may substitute sanding bushings upon request.

Gift Boxes

Presentation is everything! Add a professional touch to your pens with our Gift and Display Boxes.

Wooden Boxes Our solid hardwood boxes feature high quality hinged lids for years of use, and can serve double duty as a desk plaque when laser engraved (see back page). Choose from maple or rosewood, with one or two slots for pens. Holds any type of pens. Sold in packages of ten.

CN-23 Maple(10), two slots **\$49.50**
CN-24 Rosewood(10), two slots **\$49.50**
CN-25 Maple(10), one slot **\$45.50**
CN-26 Rosewood(10), one slot **\$45.50**

Velvet Boxes Black with gold band. Black and white cloth interior. Holds up to two **Slimline™** or **Executive Slimline™** pens.

CN-06 10 boxes **\$22.50**

Leatherette Boxes Black faux leather exterior with grey interior. Holds up to two large pens.

CN-15 10 boxes **\$29.50**

Plastic Boxes Clear hard plastic top with red velvet lining. Holds two small or one large pen.

CN-22-10 10 boxes **\$7.50**
CN-22-50 50 boxes **\$35.00**

Plastic Sleeves Clear flexible plastic. Holds two small or one large pen.

CN-21-10 10 sleeves **\$3.50**
CN-21-50 50 sleeves **\$13.50**

Display Box Black leather with grey interior. Holds 48 pens.

CN-14 1 box **\$32.95**

Production Systems

If you're just getting started, why not save a bundle with one of our Production Systems? We've put together absolutely everything you'll need (except the lathe), to be in business before you know it! Simply order the lathe that's right for you and decide which type of pens/pencils you want to start making. We have a Production System for each of our pen styles. If you'd prefer to start with a variety, we'll be happy to assist you in designing a custom Production System just for you.

Our Production Systems Have Everything You Need To Go With Your Lathe

You Simply Can't Go Wrong!

We are so confident of how easily you will achieve professional results with the **WoodWrite, Ltd.** system of pen and pencil turning, that

we will not allow you to make a mistake!

If you are using **WoodWrite, Ltd.** equipment and parts (lathe, assembly press, pre-drilled blanks, pen kits and **Turner's Magic™** - all the components included when you purchase a lathe and Production System), we will replace any part of a pen or pencil kit, including the wood, which is damaged in any way! We suggest you save up such pieces and return them to us periodically. We will then replace anything you damaged for any reason at no cost other than \$5.00 s/h per shipment.

No one beats our quality, service, or our guarantee.

All Production System include:

KT-07 Assembly Press • **CN-11** & **CN-17** Turner's Magic™ Sealer and Polish • **CN-01** & **CN-12** Adhesives • **CN-13** Barrel Trimmer • **CN-05** & **CN-10** Abrasive Cloths • required mandrel(s) • labeled parts box for pen/pencil kits • safety goggles • detailed instruction manual • **WW-99** Woods of the World sample panels • disposable gloves • polish applicator pads • your choice of pre-cut and drilled wood from Rare, Exotic and Standard varieties (*Very Rare, Crushed Velvet, Assortment packs not eligible*) • **100** pen/pencil kits as listed below.

Titanium Gold Plating

We are pleased to be able to offer our exclusive WoodWrite, Ltd. Titanium Gold plating on our Slimline™, Executive Slimline™, Signature™ and Continental™ pen and pencil kits at prices you won't believe! Unlike other's Titanium Gold kits, which may appear grainy as the epoxy coating wears off, WoodWrite, Ltd. Titanium Gold plating is a true 24k gold finish over a special Titanium base which actually shines up as it wears! Our Titanium Gold plating has a Rockwell hardness of 75. Tool steel is 65, and a diamond is 100.

Slimline™ Titanium Gold pen & pencil (above), in Tulipwood.

Classic Gold Slimline™ Pen in Cocobolo, Classic Black Slimline Pencil in Canarywood. Shown with CN-22 Plastic Gift Box (pg 3).

Signature™

Our Best Sellers! Exclusive WoodWrite, Ltd. design does away with the unsightly (and heavy) cap holder stub found on lesser quality pens. Our cap screws into place in both the open and closed position, resulting in a very well balanced writing instrument, which is just 5.25" long when closed. Roller Ball (RB) uses any roller ball refill and pencil uses .7mm lead. RB easily converts to FP using FP-CONV. Fountain pens (FP) include both a pump and a cartridge. Use FRB-10 mandrel or KT-28 sanding bushings w/7mm mandrel for RB and FP pens, and KT-22 mandrel or KT-31 sanding bushings for pencil. Titanium Gold plating in your choice of black or gold caps, or 1/2 of each. Quantities of 10, 50, or 100.

The Pens

Is there a market for the pens?
Absolutely! Wood pens are known for reducing writer's cramp because they are easier to grip than plastics. Your customers will cherish them and return again and again to purchase replacements and gifts! Additionally, laser engraving (see back page) allows you to customize your pens with signatures, corporate logos, etc., or you can target specific markets with our sports, musical, medical, and religious clip styles (CL-MIX-10) for **Slimline™**. In addition to universities, corporations, sporting goods, music, department, drug and jewelry stores, pens sell at craft and art shows and through word of mouth.

How much should I charge?
The following is a guideline of **average** retail prices as reported to us by our customers. Wholesale prices are usually 50% less, and prices **will vary** by region and local market conditions: **Continental™** or **Executive Slimline™** sets \$120-\$150 • **Signature™** Roller Ball \$80-\$120, Fountain Pen \$90-\$130, pen & pencil set \$160-225 • **Slimline™** set \$50-\$60 • **WriteMaster™** set \$70-\$90.

How long does it take?
We routinely turn, sand, polish and assemble a **Slimline™** pen or pencil in about 3 minutes using the **WoodWrite, Ltd.** system. You can expect to quickly increase your speed up to 8-12 pens or more per hour! The system is almost automatic, but allows you to enjoy your creativity too.

What do I need to get started?
In addition to the lathe of your choice, we recommend beginning with a Production System. **WoodWrite, Ltd.** Production Systems have been designed to give you everything you could possibly need to get started - at a significant savings! See page 3 for details.

Executive Slimline™

Another exclusive design from WoodWrite, Ltd. Engineered for the individual who feels the Slimline™ is too small and the Continental™ is too large. Features the same durable twist mechanism as the Continental™ and uses a Parker® pen refill and .7mm lead. Use KT-22 mandrel or KT-26 sanding bushings w/7mm mandrel. Titanium Gold plating in your choice of black or gold caps, or 1/2 of each. Quantities of 10, 50, or 100.

Crushed Velvet

Save Time with Pre-Cut & Drilled Blanks

One of the most frustrating and difficult aspects of pen making is drilling perfectly straight and centered holes in which to glue the brass lining cylinders prior to turning. **WoodWrite, Ltd.** takes care of this unpleasant task for you by providing pre-cut, pre-drilled blocks in several styles. These blocks come in 34 varieties of Very Rare (**WV**), Rare (**WR**), Exotic (**WX**) and Standard (**WS**) woods, as well as six colors of Crushed Velvet (**CV**), a man-made plastic material. Look for new wood varieties in the near future.

Pricing

When ordering, specify wood variety, number and style of Slimline™ pen or pencil, Continental™ (pen & pencil use the same blank), Executive Slimline™ pen or pencil, Signature™ pen or pencil, WriteMaster™ pen or pencil, or SuperSlim pen or pencil.

	Slimline™	Other	Undrilled

Pen Assembly

Clean up any polish or glue from the ends of your turned barrels with our barrel trimmer, then assemble. Unlike clamps or poorly manufactured raming devices, *our assembly presses will give you a perfect result every time - no more scratches, misalignment or broken parts!* If you have difficulty turning the crank of the **KT-07** (shown), or want the absolute

fastest method of assembly, then our **KT-23** pneumatic press is for you.

CN-13 Barrel Trimmer \$ 3.95
KT-07 Assembly press \$135.00
KT-23 Pneumatic press \$399.95

Wood Blank Specifications

Blanks are cut to the exact length required for each style of pen or pencil. Wood grain of top and bottom barrels is matched for all 5/8" square packages. Pen and pencil packages ordered together are matched for color and grain.

Slimline™ Pen blanks are 0.4" square and make 11 pens per package.

Slimline™ Pencil blanks are 0.4" square and make 11 pencils per package.

SuperSlim™ Pen or Pencil blanks are drilled for Slimline™ parts, but are 5/8" square and make 5 items.

All Other Blanks are 5/8" square and make 5 pens (or pencils) per package.

Undrilled packs make 5 items. Each piece is 5" long by 5/8" square.

Rare Assortment Packs contain wood for one pen/pencil each of Bloodwood, Brazilian Rosewood, Canarywood, Cocobolo and Tulipwood.

Exotic Assortment Packs contain wood for one pen/pencil each of Bocote, Curly Mahogany, Honduran Rosewood, Padauk and Purpleheart.

Standard Assortment Packs contain wood for one pen/pencil each of Cherry, Mahogany, Red Oak, Walnut and White Ash.

Crushed Velvet Assortment Packs contain material for one pen/pencil each in Black, Blue, Green, Orange, Red and Yellow.

Woods of the World Sample Panels

WW-99 \$19.95

A finished and labeled sample panel of each of the woods we carry. Pre-drilled hole for stringing on a bead chain, included. Free updates upon request as we add new varieties.

Turning Supplies

Abrasives

We have searched the world to bring you the finest abrasive **cloth** (*not paper!*) available. Our 280 and 400 grit are both 1" wide in 10 yard long rolls. For **Crushed Velvet** and other plastics use our wet/dry assortment (*use wet!*), comes in 8" x 11" sheets, 2 ea of 280, 400 and 600 grit, and finish up with our **CN-19** Finishing Compound.

CN-05 280 grit cloth \$4.95
CN-10 400 grit cloth \$5.95
CN-18 Wet/Dry Assortment . . . \$7.95
CN-19 Finishing Compound . . \$5.95

Adhesives

Nothing can beat **WoodWrite, Ltd.**'s special **CN-01** adhesive for gluing brass cylinders. Unlike CA glue, it is gap filling, and has tremendous shear strength. You don't even need to rough up the brass prior to gluing! Add a little security to your mechanical fittings without marring the finish with our **CN-12** Pencil Joint Adhesive.

CN-01 2fl oz \$9.95
CN-12 1fl oz \$3.95

Polishes

For a finish that won't wear off like wax, french polish or other inferior products, try our famous Turner's Magic™ friction drying sealer and lacquer based polishes. They have a beautiful natural looking finish and are simply the only choice for objects which are handled. Prevent resins from surfacing later by sealing them first with **CN-11 Sealer**, then finish up with **CN-16 Semi-Gloss** for open grained wood or **CN-17 Super-Gloss** for close grained wood. You'll be happy with the results for a long, long time! It's also nontoxic when dry and great for salad bowls and wine stoppers.

CN-11 Sealer, 8fl oz \$11.95
CN-16 Semi-Gloss, 8fl oz . . . \$11.95
CN-17 Super-Gloss, 8fl oz . . . \$12.95

Finishing Compounds use a dark or light stain to enhance the look of natural wood prior to polishing.

CN-02 dark, 2fl oz \$5.95
CN-03 light, 2fl oz \$5.95

Standard Wood

WoodWrite, Ltd. Laser Engraving Service

WoodWrite, Ltd. now offers laser engraving of Acrylic, Anodized Aluminum, Coated Metals, Composites, Fabric, Fiberglass, Glass, Laminated Plastics, Leather, Marble, Masonite, Melamine, Nylon, Plastics, Polyester, Stone, Veneer, Vinyl, and Wood. Generally speaking, our state of the art Universal™ system can engrave any substance whose surface can be safely burned or melted. Please call if you have any questions.

Cost for engraving pens/pencils/boxes is \$2.00 per line, minimum of 10 lines or \$20 per shipment, plus shipping. Quantities over 100 lines receive a 25% discount. Each line may contain different text.

Most logos on pens/pencils/boxes may be etched at the \$2.00 per line charge. Image must be provided printed oversize on clean, glossy paper (no faxes), or on an IBM compatible disk (.pcs, .bmp, .gif, .jpg, .tif - no MAC files). For the purpose of an accurate quote, please send or fax a copy of the graphic. A logo and a name on a box will be considered two lines.

Imprint will be sized for best visual effect. Artwork by fax or copy from a business card or letterhead is not considered camera ready art. A \$50.00 per hour charge applies for images which need to be digitally enhanced. See order form for more details.

Laser Engraving Examples: Continental™ pen in Curly Maple, with two lines of engraving and optional custom clip emblem (pg 5). CN-24 gift box (pg. 3) with one logo and one line of engraving in gold foil.
